Please Note: The examples produced as part of this project are to show how patient information should be placed under the headings developed in the EC discharge summary standard for a range of different patient requirements. Please note that the headings cover all possible information needs, and only those headings which are relevant to a given patient's needs are included in the example letter.

The standard does not specify the layout or appearance of the discharge, which is for local determination, and therefore the examples are not intended to be used as templates. For the people creating templates in their organisation, please read the implementation guide.
