Release Notes

Healthy child standard - record specification V2

Publication Date: December 2018

This document details the changes made in the latest V2 release of the Healthy child standard record specification.

HCR001

Measurements are now included in the Observations section.

HCR002

Immunisations section renamed to Vaccinations section with changes to support additional use cases.

HCR003

Diagnosis and problem list sections replaced with Problem list section to align with maternity record standard.

HCR004

An existing PRSB section for Investigation results added into the standard.

HCR005

Cognition element removed from Individual requirements section.

HCR006

Referral method element removed from Referral details section.

HCR007

Medications model updated with new clusters, medication change item, discontinued medication item cluster and medication administrator cluster.

HCR008

NHS number removed from personal contacts.

HCR009

Mother and Father's employment status in the Social context section replaced with Caregiver 1 and Caregiver 2.

HCR010

Added Reason for association created in Professional contacts
