

Release Notes

This document lists all changes made to the **Pharmacy information flows standard** from stage 1 to stage 2.

Vaccine administration – community pharmacy record

Referrer details section

Three additional headings have now been included in this section:

- Reason for referral
- Clinical urgency of referral
- Date and time of referral

Attendance details section

The description for 'service' has been made more generic.

'Location of administration' has been changed to 'location of event' to be consistent with other pharmacy use cases.

Four additional headings have now been included in this section:

- Reason for non-provision of service
- Clinician name
- Role
- Professional identifier

Consent for information sharing

The description and values for this heading has been updated to be consistent with the other pharmacy use cases.

Vaccinations section

Three headings have been removed from this section as this information will be captured in the 'attendance details' section:

- Administered by
- Role
- Professional identifier

Referral details section

This section has now been added into the standard to enable the recording of onwards referrals.

Distribution list section

This section has now been added into the standard to enable the recording of individuals who should receive a copy of the communication.

Vaccine administration – notification to GP

Referrer details section

This section has been removed as it not pertinent for the notification to the patient's GP.

Attendance details section

The description for 'service' has been made more generic.

'Location of administration' has been changed to 'location of event' to be consistent with other pharmacy use cases.

Four additional headings have now been included in this section:

- Reason for non-provision of service
- Clinician name
- Role
- Professional identifier

Consent section

The description and values for the 'consent for information sharing' heading has been updated to be consistent with the other pharmacy use cases.

All of the consent headings have been changed to 'optional' fields to align with feedback received from GPs in the consultation.

Vaccinations section

Two headings have been removed from this section as this information will be captured in the 'attendance details' section:

- Administered by
- Role

Referral details section

This section has now been added into the standard to enable the recording of onwards referrals.

Distribution list section

This section has now been added into the standard to enable the recording of individuals who should receive a copy of the communication.
