Emergency Care discharge standard

V2.2

Publication Date: May 2023

Updates have been made to the standard as part of this maintenance release due to:

- **Alignment with the [Core Information Standard \(CIS\)](#).**
- **Alignment with other completed [PRSB standards](#)** projects since the previous release.
- **Alignment to FHIR standards** - includes updated value sets for many elements.
- **Maintenance issues** raised by users and logged since the previous release.
- **Must have's** have been considered and updated.

Please also note that all new elements include associated value sets and these can be found in the information model.

Section: Person Demographics

Elements	Update	Detail	Rationale
Patient address	Updated sections and new elements added.	Patient address Conformance – M Cardinality – 0..1 changed to 1..* New elements added: - Address line 1 (Required, 1..1) - Address line 2 (Required, 0..1) - Address line 3 (Required, 0..1) - Address line 4 (Required, 0..1) - Address line 5 (Required, 0..1) - Postcode (Required, 0..1) All new elements included updated value sets.	Align with CIS

Section: Procedures

Elements	Update	Detail	Rationale
Procedure name	Updated cardinality	1..1 changed to 0..1	Align with CIS
Anatomical site	Updated cardinality	0..1 changed to 0..*	The body site of the procedure can be more than one.
Laterality	Updated cardinality	0..1 changed to 0..*	The laterality of the procedure can be more than one.

Section: Diagnoses

Elements	Update	Detail	Rationale
Comment	Updated description	Description now also includes the following (from implementation guidance): “Where there is no ‘confirmed present’ diagnosis then: - The chief complaint (a symptom) is used to populate the diagnosis entry ‘diagnosis data item, e.g. ‘Shortness of breath’ - The ‘suspected’ diagnosis is converted into a text entry and this is used to populate the diagnosis entry ‘comment’ data item. e.g. ‘Suspected diagnosis: pulmonary embolus’.”	SPS assessors – easier for users to see this detail in the description in the model.

Section: Medications and Medical Devices

Elements	Update	Detail	Rationale
----------	--------	--------	-----------

Medication item entry (Group)	Removed cardinality	Removed 0..*	
Medication item cluster	Updated cardinality	Updated 0..*	Cardinality should be on the cluster
Quantity supplied > Date supplied	New field added	Conformance – Required Cardinality – 0..1 Value set updated.	Align with CIS
Medication Item > Quantity supplied	Cardinality changed	0...* changed to 0...1	Only one quantity needed per medication item.
Structured dose direction cluster	Restructured items to proceed after groups	Restructured order of elements - Structured dose direction cluster (Must have) - Dose direction description - Structured dose amount cluster - Dose amount description - Structured dose timing cluster - Dose timing description Conformance, cardinality, and value set updated.	Review by SMEs
Dose duration directions	New field added	Conformance – Required Cardinality – 0..1 Value set updated.	Review by SMEs

Section: Risks

Elements	Update	Detail	Rationale
Risks	New elements added	New elements added: - Risk record entry (0..*) - Start date of risk - End date of risk - Risk - Coded value - Free text - Comment Conformance – Required Cardinality – 0..1 All value sets updated.	Align with CIS and other PRSB standards

Section: Information and advice given

Elements	Update	Detail	Rationale
Information and advice given	Value set updated	Free text description of information and advice given and patient/carer comprehension.	

Discharge Information Given Indicator	New element added	Conformance – Mandatory Cardinality – 1..1 Value set updated.	Sent as per ECDS Urgent & Emergency Care 'Discharge Information Given Indicator' code set
---------------------------------------	-------------------	---	---

Section: Distribution lists

Elements	Update	Detail	Rationale
Distribution list record entry	New section and elements added	Updated section and elements: - Distribution list record entry - Name - Role - Grade - Organisation name - Team - Relationship	Align with CIS and other PRSB standards

Section: Plan and requested actions

Elements	Update	Detail	Rationale
Action	Updated element	Conformance – Mandatory Cardinality – 1..* Value set updated	Align with CIS and other PRSB standards
Date	New element added	Conformance – Required Cardinality – 0..1 Value set updated	Align with CIS and other PRSB standards
Action for professionals	New element added	Conformance – Required Cardinality – 0..1 Value set updated	Align with CIS and other PRSB standards
Actions for person or their carer	New element added	Conformance – Required Cardinality – 0..1 Value set updated	Align with CIS and other PRSB standards
Agreed with the person or their legitimate representative	New element added	Conformance – Required Cardinality – 0..1 Value set updated	Align with CIS and other PRSB standards
Outcome of plan and requested actions	New element added	Conformance – Required Cardinality – 0..1 Value set updated	Align with CIS and other PRSB standards
Investigations requested	New element added	Conformance – Optional Cardinality – 0..* Value set updated	Align with CIS and other PRSB standards
Procedures requested	New element added	Conformance – Optional Cardinality – 0..* Value set updated	Align with CIS and other PRSB standards
